

The Shellback Mobile Application

An official U.S. Navy mobile application produced by MyNavy HR IT Solutions

What is the Shellback App?

Shellback, formerly known as eDIVO, is a free mobile app developed to support US Naval Surface Force (SURFOR) personnel. Shellback offers users the most current and relevant information in a single easy-to-access off-line environment.

The app provides Sailors the ability to download key SURFOR information on their own portable devices and access it while underway. Content is scheduled for annual updates.

What is a Shellback?

In naval tradition, a "Shellback" is a nickname for a Sailor who has crossed the Equator and has thus transitioned from a novice to experienced Sailor.

What Information Is In Shellback?

The information in Shellback is separated into several main categories:

Admin/Training: Contains the Correspondence Manual and the Surface Force Training and Readiness Manual.

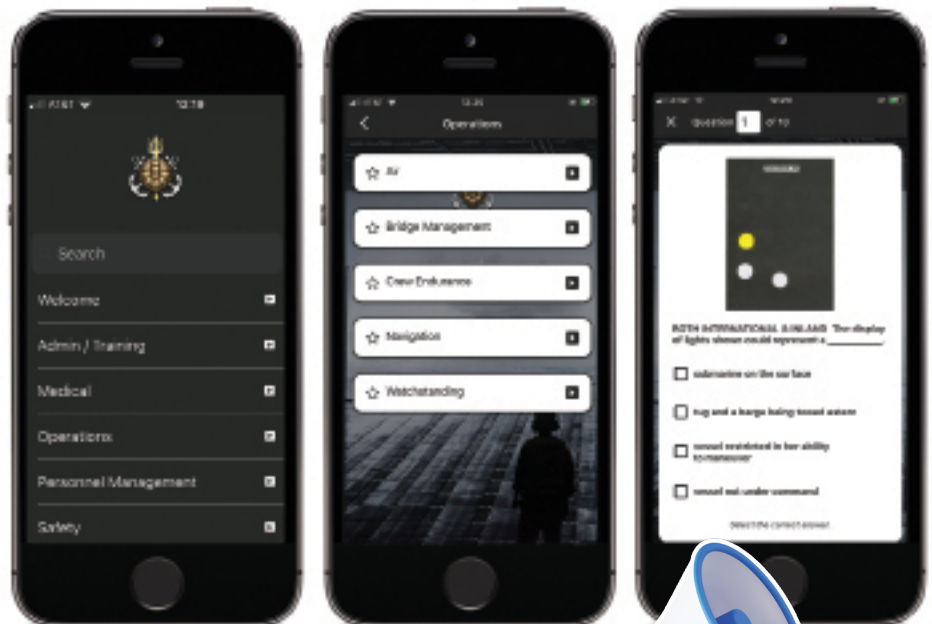

Medical: Includes the Manual of the Medical Department and information on medical and physical readiness, mental health, Medical Evaluation Board procedures, the Disability Evaluation System, family member readiness, and more.

Operations: Includes information and training on bridge management, navigation basics, watch team tools, crew endurance, operating procedures, air certification for Naval SURFOR ships, and manuals for amphibs, maintenance, and other general ship operation resources.

Personnel Management: Contains numerous resources related to personnel policy, admin, and legal issues, as well as resources for SURFOR officers.

Safety: Provides documents related to lessons learned, mishap reporting, notices, safety-related awards, and general safety resources.

Rules of the Road: This quiz tests a Sailor's knowledge of maritime navigation rules.
